PEXELS360

Matterport in India

COMPANY PROFILE · 2026

3D DIGITAL TWINS & VIRTUAL TOURS

A true digital copy of any physical space.

We capture factories, showrooms, homes, hotels and hospitals with Matterport Pro3 LiDAR and turn them into immersive 3D walkthroughs anyone can explore, from anywhere.

01 — ABOUT US

We scan real spaces and turn them into exact, explorable digital replicas.

Pexels360 Solutions LLP is an Official Matterport Service Provider, delivering 3D digital twins and virtual tours to clients across India since 2021.

Our team travels to any city in India, for a single site or a multi-location rollout. We capture factories, offices, showrooms, hotels, hospitals and homes with Matterport's Pro3 LiDAR scanner, and deliver tours that help clients sell, lease, train, audit and market their spaces.

CAPTURE

Accurate 3D scanning

LiDAR records real depth and dimensions, not just pictures, for a true-to-life record.

EXPERIENCE

Self-guided navigation

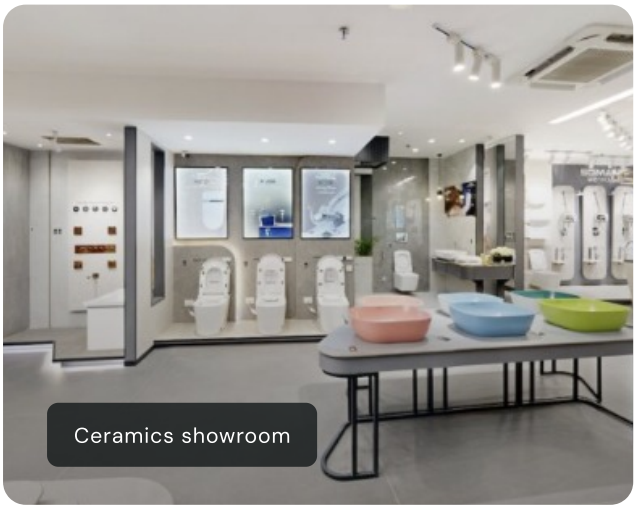

Visitors walk freely through the space and explore it at their own pace, as if they were there.

ACCESS

Open anywhere, anytime

One shareable link works 24/7 on phones, laptops and VR browsers, with no app to install.

What you receive with every project.

PRIMARY DELIVERABLE

3D Virtual Tour (Digital Twin)

A true digital copy of your space, captured with Matterport's latest Pro3 LiDAR scanner. Delivered as a simple link you can share with anyone and embed on your website.

INCLUDED WITH EVERY TOUR — AT NO EXTRA COST

01 **Google Maps (Street View) integration**

Your tour is published on Google Maps, strengthening your presence there with greater visibility and impressions.

02 **2D snapshots (photos)**

High-quality still photos of your space, ready for your website, listings and online marketing.

03 **Complete information tagging**

Text, media and external links, such as product or booking pages, placed at exact spots to tell your story. Tagging is ongoing: we add or edit tags whenever you send new information.

04 **External integrations**

Your videos, photos, PDFs and other content integrated directly within the tour. Videos should be hosted on YouTube or Vimeo, with links shared with us.

ALSO AVAILABLE ON REQUEST

Custom tours & microsites

Branded interface, custom menus, CTA buttons, intro videos and launch screens.

Promo videos & reels

Showcase reels and ready-made promotional videos for social media.

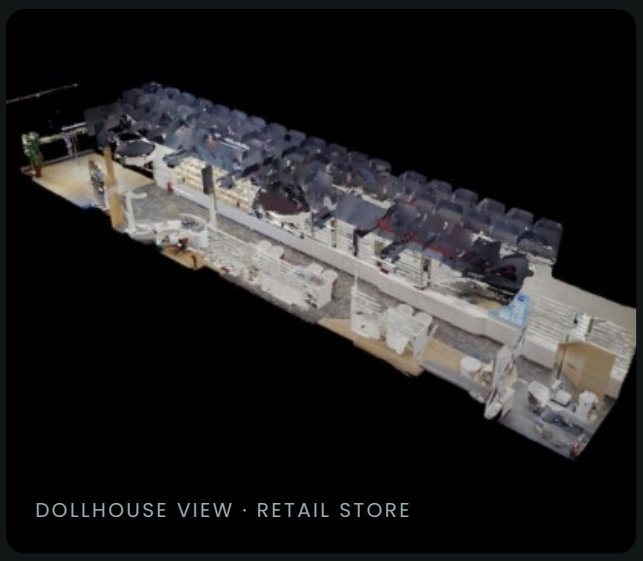

Floor plans & engineering data

Schematic floor plans and point-cloud exports for BIM workflows.

Hosting & renewals

Secure hosting with unlimited views, password protection and multi-year terms.

Navigable, measurable and built on real depth data.

DOLLHOUSE VIEW · RETAIL STORE

DOLLHOUSE VIEW · FACTORY, MUMBAI

01 **Free walk-through navigation**
Move naturally between connected rooms with a real sense of space.

02 **3D dollhouse view**
See the entire building and layout at a glance, then jump to any area.

03 **Floor plan view**
A top-down plan for quick orientation across large sites.

04 **Measurements**
Measure distances, heights and dimensions remotely, point to point.

05 **Multiple floors & stairs**
All levels joined in one tour. Take the stairs or switch floors instantly.

06 **Guided highlight reel**
An auto-playing tour that starts with one click, ideal for presentations.

07 **VR-ready by default**
Every tour opens in a VR browser for a fully immersive experience.

08 **Privacy controls**
Password protection, blurred sensitive details and hidden areas.

04 — INDUSTRIES WE SERVE

Nine industries, from pharma plants to luxury villas.

01

Manufacturing & Pharma

Virtual factory visits for buyers, exporters, auditors and HQ teams, without disrupting the shop floor.

02

Residential Real Estate

Projects, sample flats, villas and resale homes that buyers can tour before they visit.

03

Commercial Spaces & Offices

Offices, co-working and commercial properties shown to tenants and investors anywhere.

04

Retail & Experience Centres

Showrooms with tagged products, links to buy and a consistent benchmark for new outlets.

05

Hotels, Resorts & Rentals

Let guests explore rooms and amenities, with booking links built into the tour.

06

Hospitals & Clinics

Build patient confidence by showing facilities, equipment and care spaces in advance.

07

Schools & Universities

Campuses, classrooms and labs for admissions, parents and remote stakeholders.

08

Museums & Art Galleries

Preserve exhibitions permanently and open them to a global audience.

09

Construction

A precise spatial record of sites and buildings for documentation and planning.

> **Reusable across teams.** The same tour supports sales, marketing, onboarding and training, remote stakeholder visits and future planning, saving the time and cost of travel.

Show your plant to buyers and auditors without arranging a visit.

Hosting buyers, auditors or leadership at a plant takes weeks of coordination. We capture your facility in a planned, non-disruptive shoot, scheduled around your production, and turn it into a secure 3D walkthrough your team can share in minutes.

DIGITAL TWIN

A manufacturing headquarters, captured end to end as one digital twin.

Sales & marketing impact

Give prospects a virtual factory visit that builds confidence before the first physical one.

Exports & business development

Let overseas buyers and distributors qualify you without international travel.

Presentations & trade shows

Far more engaging than brochures, photos or videos in pitches, websites and exhibitions.

Remote audits & RFPs

Buyers and inspectors can walk production lines, QA labs and warehouses remotely.

Layout & MEP planning

Take measurements inside the tour to support machinery, piping and floor changes.

EHS & SOP training

Tag equipment with manuals, safety protocols and videos to onboard engineers remotely.

> **Confidentiality first.** We scan only approved areas, blur proprietary zones and password-protect tours. Much of our industrial work is under NDA. We are happy to walk you through it on a call.

Matterport 3D vs. 360° photos: what you actually get.

	Matterport 3D Digital Twin Pexels360 · Pro3 LiDAR	Traditional 360° Photography Panoramic camera
Technology	✓ LiDAR captures real-world depth and spatial data	— Panoramic photos without depth measurement
Navigation	✓ Move through connected spaces naturally	— Jump between photos using hotspots
3D dollhouse view	✓ Complete 3D overview of structure and layout	— Not available
Measurements	✓ Measure distances, heights and dimensions remotely	— No reliable measurement
Floor plan view	✓ Top-down view, with optional schematic plans	— Plans created separately
Remote audits & inspection	✓ Full spatial context around equipment and lines	— Fixed viewpoints, limited context
Engineering data	✓ Point-cloud and BIM-compatible exports	— No point-cloud data
Digital documentation	✓ A true 3D spatial record for future planning	— Photographic record only
2D photos & Street View	✓ Included with every tour	— Usually charged extra
Ideal for	✓ All industries and property types	— Basic photo-led marketing

Six steps. Most projects delivered within 2 days of the shoot.

01

Discovery & scope

We understand your goals, the areas to capture and any confidential zones, then share a clear quotation.

02

Site preparation

Your team keeps the space shoot-ready, clean and arranged exactly as you want it seen.

03

3D scanning on site

Our team captures the space from multiple scan points with Matterport Pro3 LiDAR, with minimal disruption to your operations.

04

Post-production & tagging

We align and process the scans, blur sensitive details, and add your information tags, media and links.

05

Delivery, usually within 2 days

You receive your tour link, embed code, 2D photos and Google Street View publication.

06

Hosting & ongoing support

We host and maintain your tour, and keep adding or editing tags as you share new information.

Good to know

- We show a space exactly as it is, with no cosmetic edits, so what viewers see is what they get.
- Scanning time depends on the area and scope. Large sites are planned in phases.
- For invoicing, we need your company name, address, GST number and a point of contact.
- Sensitive details can be blurred, and any area can be skipped or hidden later.
- Tours work in any VR browser. We do not supply VR hardware.

What our clients say.

Chemco has had a longstanding relationship with Pexels360, working with their team on virtual tours of six to seven large manufacturing facilities across India and the Middle East. Throughout these projects, they have consistently understood our requirements and delivered excellent results, making the most of the Matterport platform.

Our plant layouts were not always straightforward to capture, but the team found creative ways to showcase each facility. No detail was too small and no project too large. Their professionalism, technical expertise, attention to detail and commitment to timely delivery have stood out throughout our association.

We particularly appreciated their flexibility. Manufacturing schedules, weather conditions and audits sometimes required us to reschedule shoots multiple times, and the team readily accommodated these changes with patience and understanding.

The quality of their work speaks for itself. We highly recommend Pexels360 for virtual tour projects of any scale.

Raghav Sarin
Manager – International Business & Marketing, Chemco Group

We perform scanning all over the world and are glad we've finally found a reliable partner for India. Anyone with Matterport needs in India can trust the Pexels360 team with their work. Thank you again for your professional support and dedication to our project.

John Mickey
Founder, Factory Reality

We had a great experience with Pexels360 for our office's 360° virtual tour. Their team was professional, supportive, and responsive throughout the process. Highly recommended for anyone looking for quality virtual tour services!

Vijay Kongi
Manager, Nidec Leroy

10 — LEADERSHIP

Meet the founders.

Chetan Kumbhar and Shailesh Toraskar started Pexels360 in 2021 after seeing, in real estate, how hard it was to present a property accurately online.
